### Getting Electricity Services

#### Electrical contractors' Inspection & Testing certificates and LV Panel Clearance on-line submission

Dear Customers,

The Authority is constantly endeavoring to improve its services to all Customers. We thank you for your valuable cooperation and coordination with us to provide the best services within minimum time limit.

In continuation to the simplification and enhancement of the 'Getting Electricity' process, provision has been made to fill the Inspection & Testing certificate in the DEWA standard format, during the notification of readiness for inspection. This eliminates the requirement to upload the scanned format of hard copy certificates. Customers are able to utilize the above for all existing and new projects, including the fit-outs for which uploading of the certificates are not yet made.

For projects with private LV panels, the 'Panel Clearance Certification' can also be made on-line. Upon completing the installation and testing of the LV Panel, including termination of the single core cables connected to DEWA transformer, the customer can tick the checkbox under the header Panel Clearance Certification, instead of uploading the certificate.

Thanking you in anticipation of your continued support.

Yours Faithfully

For DUBAI ELECTRICITY & WATER AUTHORITY

Obaid Al Falasi
